Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Typical operations Limits and continuity. A study of limits and continuity in multivariable calculus yields many counter-intuitive results not demonstrated by single-variable functions.: 19“22 For example, there are scalar functions of two variables with points in their domain which give different limits when approached along different paths. E.g., the function
