A chi-squared test, also written as  $\chi^2$  test, is any statistical hypothesis test where the sampling distribution of the test statistic is a chi-squared distribution when the null hypothesis is true. Without other qualification, 'chi-squared test' often is used as short for Pearson's chi-squared test. The chi-squared test is used to determine whether there is a significant difference between ...

In electromagnetism, the magnetic susceptibility (Latin: susceptibilis, "receptive"; denoted  $\chi$ ) is a measure of how much a material will become magnetized in an applied magnetic field. Mathematically, it is the ratio of magnetization  $M$  (magnetic moment per unit volume) to the applied magnetizing field intensity  $H$ . This allows a simple classification of most materials' response to an applied ...

Best Paper Awards are presented at many ACM conferences to authors whose work represents groundbreaking research in their respective areas. By recognizing these select papers for their ingenuity and importance, ACM highlights some of the theoretical and practical innovations that are likely to shape the future of computing.
