A histogram is an accurate representation of the distribution of numerical data. It is an estimate of the probability distribution of a continuous variable (quantitative variable) and was first introduced by Karl Pearson. It differs from a bar graph, in the sense that a bar graph relates two variables, but a histogram relates only one. To construct a histogram, the first step is to "bin" (or ...

We consider a random variable x and a data set $S = \{x_1, x_2, \dots, x_n\}$ of size n which contains possible values of x . The data set can represent either the population being studied or a sample drawn from the population. Looking at S as representing a distribution, the skewness of S is a measure of symmetry while kurtosis is a measure of peakedness of the data in S .
