A typical OLED is composed of a layer of organic materials situated between two electrodes, the anode and cathode, all deposited on a substrate. The organic molecules are electrically conductive as a result of delocalization of pi electrons caused by conjugation over part or all of the molecule. These materials have conductivity levels ranging from insulators to conductors, and are therefore ...

OPEC has released their Annual Statistical Bulletin 2014. Under the heading of "Oil and Gas Data" there are several tables you can download. I was excited to find one labeled "Table 3.21: World Exports of Crude Oil and Petroleum Products by Country". It turned out to be useless however as it includes a lot of exports of imported products.
