The market is projected to reach USD 2487.34 million by 2022, growing at a CAGR of 3.34% during the forecast period (2017 to 2022). Mycotoxin detoxifiers, when used in animal feed, prevent the contamination of feed by mycotoxins, which are a collective group of natural chemicals (toxic secondary metabolite) produced by certain molds.

Offshore aquaculture, also known as open ocean aquaculture, is an emerging approach to mariculture or marine farming where fish farms are moved some distance offshore. The farms are positioned in deeper and less sheltered waters, where ocean currents are stronger than they are inshore. Existing <sup>^</sup>offshore<sup>™</sup> developments fall mainly into the category of exposed areas rather than fully offshore.

The aquaculture of salmonids is the farming and harvesting of salmonids under controlled conditions for both commercial and recreational purposes. Salmonids (particularly salmon and rainbow trout), along with carp, and tilapia are the three most important fish species in aquaculture. The most commonly commercially farmed salmonid is the Atlantic salmon. In the U.S. Chinook salmon and rainbow ...
