Java Programming for Complete Beginners - Learn in 250

A Java class file is a file (with the .class filename extension) containing Java bytecode that can be executed on the Java Virtual Machine (JVM). A Java class file is usually produced by a Java compiler from Java programming language source files (.java files) containing Java classes (alternatively, other JVM languages can also be used to create class files).

Generate PDF files from Java applications dynamically. A step-by-step guide to iText, an open source library that makes PDF creation easy

Generate PDF files from Java applications dynamically

Returns the cube root of a double value. For positive finite x , $\text{cbrt}(-x) == -\text{cbrt}(x)$; that is, the cube root of a negative value is the negative of the cube root of that value's magnitude. Special cases: If the argument is NaN, then the result is NaN. If the argument is infinite, then the result is an infinity with the same sign as the argument.
