pressure relief. Mechanical design of a horizontal pressure vessel based on this standard had been done incorporating PV ELITE software. Analyses were carried out on head, shell, nozzle and saddle. The input parameters are type of material, pressure, temperature, diameter, and corrosion allowance. Analysis

Mechanical design of pressure vessel by using PV-ELITE

This pressure comes from an external mechanical design of the three phase separator source or by the application of heat from a direct that basically a pressure vessel. Therefor it is or indirect source or any combination of them.

mechanical design criteria defined herein form the basis of the design for the mechanical components and systems of the project. It is not the intent of this appendix to present the detailed design information for each component and system, but rather to summarize the codes, standards, and general criteria that is generally used.

MECHANICAL DESIGN CRITERIA (PROJECT STANDARDS AND

Association) standards for the mechanical design of unfired shell and tube heat exchangers. The TEMA standards are applicable for the maximum shell ID and wall thickness of 60 and 2 inch, a maximum design pressure of 3000 psi and a maximum nominal diameter (inch) — design pressure (psi) of 60000 lb/in, respectively[2]. Three basic classes of TEMA standards are: "C", "B" and "R".

Mechanical Design Fundamentals K. Craig 8 " Self-Principles " Use an object's geometry or other property to prevent a problem. " Stability " Stable, neutrally stable, and unstable effects can help or hurt. Some things can be made neutrally stable and fast, while vibration can induce instability. Beware of buckling of compression members.

employed in valve design. EO 1.2 DESCRIBE how valve stem leakage is controlled. EO 1.3 Given a drawing of a valve, IDENTIFY the following: a. Body b. Bonnet c. Stem d. Actuator e. Packing f. Seat g. Disk
Introduction A valve is a mechanical device that controls the flow of fluid and pressure within a system or process.

Mechanical design is a complex undertaking, requiring many skills. Extensive relationships need to be subdivided into a series of simple tasks. The complexity of the subject requires a sequence in which ideas are introduced and iterated. To design is either to formulate a
