Microscope Mania (T. Tomm, Havana Junior High, Havana, IL) After learning about the basic parts of a microscope and an overview of the proper procedures for using them, my students visit 5 lab stations to learn more about the world of microscopes.

### **The Science Spot**

In biochemistry, dialysis is the process of separating molecules in solution by the difference in their rates of diffusion through a semipermeable membrane, such as dialysis tubing.. Dialysis is a common laboratory technique that operates on the same principle as medical dialysis. In the context of life science research, the most common application of dialysis is for the removal of unwanted ...

In conventional electrolysers with the classical plate-and-frame equipment (see Fig. 3), the feed channels are created by interposing between the membranes net spacers, maintaining a fixed inter-membrane distance and providing some mixing promotion in the channels. Spacers are provided with gaskets along the perimeter of the channels, which seal the channels and guide the solutions through them.
