A Brief Review of Elementary Quantum Chemistry C. David Sherrill School of Chemistry and Biochemistry Georgia Institute of Technology Last Revised on 27 January 2001

### A Brief Review of Elementary Quantum Chemistry

First Semester B.Tech Syllabus for Admission Batch 2016-17 e 6 APPLIED CHEMISTRY Course Objectives:  
(1) To understand the basics of molecular interactions.

### First Semester B.Tech Syllabus for Admission Batch 2016-17

The electron is a subatomic particle, symbol  $e^-$  or  $\hat{e}^-$ , whose electric charge is negative one elementary charge. Electrons belong to the first generation of the lepton particle family, and are generally thought to be elementary particles because they have no known components or substructure. The electron has a mass that is approximately 1/1836 that of the proton.

### Electron - Wikipedia

A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the elements appropriately classified as such. Despite the lack of specificity, the term remains in use in the literature of chemistry.. The six commonly recognised metalloids are boron ...

Hi Harish! Wow, your question is not a short one! Basically Gaussian uses the Berny Optimization algorithm which calculates all forces on every atom (i.e. which way and how strongly is each atom being pushed or pulled by the rest of the atoms) then it also calculates the gradient of such forces and allows them to be pushed -or pulled- just a little bit and repeats the operation until the ...
