An n th root of a number x , where n is a positive integer, is any of the n real or complex numbers r whose n th power is x : $r^n = x$. Every positive real number x has a single positive n th root, called the principal n th root, which is written $\sqrt[n]{x}$. For n equal to 2 this is called the principal square root and the n is omitted. The n th root can also be represented using exponentiation as $x^{1/n}$.
