

rock lead basics pdf

Rock climbing is an activity in which participants climb up, down or across natural rock formations or artificial rock walls. The goal is to reach the summit of a formation or the endpoint of a usually pre-defined route without falling. Due to the length and extended endurance required and because accidents are more likely to happen on the descent than the ascent, rock climbers do not usually ...

Rock climbing - Wikipedia

Lead climbing is a climbing technique used to ascend a route. This technique is predominantly used in rock climbing and involves a lead climber attaching themselves to a length of dynamic (elastic) climbing rope and ascending a route while periodically attaching protection (quickdraws or traditional protection) to the face of the route and clipping into it.
