

universal decimal classification pdf

The Universal Decimal Classification (UDC) is a bibliographic and library classification representing the systematic arrangement of all branches of human knowledge organized as a coherent system in which knowledge fields are related and inter-linked. The UDC is an analytico-synthetic and faceted classification system featuring detailed vocabulary and syntax that enables powerful content ...

Universal Decimal Classification - Wikipedia

A library classification is a system of knowledge organization by which library resources are arranged and ordered. Library classifications use a notational system that represents the order of topics in the classification and allows items to be stored in that order.

Prof. Dr. Knut Hinkelmann 6 Classification Schemes 3 Classification Classification is an organization means arranging information items into classes - dividing the universe of information into manageable and logical portions. A class or category is a group of concepts that have something in common. This shared property gives the class its identity.
